Diogo Dantas de Paula

Data Processing Analyst | Data Engineering and Automation

Santo Andre, Sao Paulo, Brazil | +55 (11) 964491263
diogo.dantas@live.com | linkedin.com/in/diogodantasp | diogo-dantas.github.io

Professional Summary

Data professional experienced in healthcare market research, statistical analysis, and workflow automation. Uses Python, SQL, SPSS, Excel, and Power BI to clean, validate, transform, and analyze datasets, run statistical tests, and build automated processing workflows. Previous experience in financial and operational analytics, KPIs, and cost optimization. Educational background spans Mathematics, Data Science, and Systems Analysis and Development. Currently expanding expertise in Machine Learning Engineering and MLOps, particularly reproducible pipelines, model deployment, and monitoring.

Technical Skills

Programming and development: Python (Pandas, NumPy), SQL, Shell scripting, Git, GitHub.
Data engineering: ETL, data pipelines, data transformation and validation, data quality, workflow automation, data modeling.
Applied statistics: SPSS, Z-tests, Student's t-tests, ANOVA, Tukey, Bonferroni, NPS, Top/Bottom Two Box, Scorecards, Gabor-Granger, BIP.
Analytics and BI: Power BI (DAX, Power Query), advanced Excel, Tableau, dashboards, KPIs, management reporting.
Platforms and systems: SAP HANA, relational databases; familiarity with BigQuery, Databricks, and cloud data services.
Current learning focus: Machine Learning Engineering, MLOps, reproducibility, experiment tracking, and the ML model lifecycle (developing expertise).

Professional Experience

IQVIA — Data Processing Analyst | Jun 2025 – Present
Sao Paulo, Brazil | Healthcare market research

- Process and structure quantitative survey datasets using SPSS, Python, SQL, and Excel for data cleaning, validation, recoding, and transformation.
- Apply descriptive and inferential statistics, including Z-tests, t-tests, ANOVA, Tukey, and Bonferroni methods, to support interpretation of results and group differences.
- Develop Python routines to automate processing, tabulation, statistical crosstabs, and analytical deliverables, supporting consistency and standardization.
- Produce frequency tables, analytical grids, scorecards, and research metrics including NPS, Top/Bottom Two Box, Gabor-Granger, and BIP.
- Build Power BI dashboards using DAX and data modeling; analyze healthcare professional profiles and key opinion leader (KOL) influence networks for business insights.

Gi Group (assigned to Volkswagen do Brasil) — Controller | Jul 2013 – Aug 2024
Sao Bernardo do Campo, Brazil | Financial and operational analytics

- Extracted, reconciled, and analyzed operational and financial data using SQL, SAP HANA, Excel, and Python to support reporting accuracy and management decisions.
- Tracked actual versus budget performance, forecasts, contract KPIs, transportation, and catering costs to identify efficiency and cost-reduction opportunities.
- Analyzed vehicle occupancy by route and shift, supporting operational reassignment that resulted in **30% fewer daily trips**.
- Built Excel and Power BI dashboards and communicated analyses and improvement proposals to operational and finance stakeholders.

Alditel Gestao Economica em Telecomunicacoes — Administrative Assistant | Jun 2011 – Jun 2013
Sao Bernardo do Campo, Brazil | Cost tracking, management reporting, and telecom systems support.

Selected Technical Projects

Survey statistical processing automation | Python, SPSS, Excel
Built routines for dataset transformation, survey tabulation, crosstabs, significance testing, and standardized analytical outputs. Professional project described without confidential data.

Airline social media sentiment exploration | Python, Pandas, Streamlit
Interactive application for exploring and visualizing text data; project documentation and demonstration available on the portfolio website.

Education

Teaching Degree (Licenciatura) in Mathematics — Universidade Virtual do Estado de Sao Paulo (UNIVESP) | 2022–2026.
Postgraduate Specialization (lato sensu) in Data Science — Universidade Presbiteriana Mackenzie | 2020–2021.
Associate Degree in Systems Analysis and Development — Universidade Paulista (UNIP) | 2017–2019.

Certifications

Databases and SQL for Data Science with Python — IBM / Coursera (2024).
Associate Data Engineer in SQL — DataCamp (2024).
Python Project for Data Engineering — IBM / Coursera (2024).

Languages

Portuguese: Native | English: Intermediate.
